

## **Steps to Complete Task-1**

### **Step 1: Create a GitHub Repository**

1. Go to [GitHub](https://github.com) and log in to your account.
2. Click on the "+" sign in the top-right corner and select "New repository."
3. Name the repository as your enrollment number (e.g., 123456789).
4. Add a description (optional).
5. Select "Public" or "Private" as per your preference.
6. Check the option "Add a README file."
7. Click "Create repository."

### **Step 2: Add Remote Repository**

1. Open Git Bash or Command Prompt.
2. Navigate to the directory where you want to create your project using the `cd` command.
3. Initialize a new Git repository using:  

```
git init
```
4. Add the remote repository:  

```
git remote add origin https://github.com/yourusername/123456789.git
```

### **Step 3: Create Folders in the Repository**

1. Open the repository in GitHub or on your local system if cloned.
2. Create two folders named:
  - o Assignment\_1
  - o Assignment\_2
3. If using the command line, run:  

```
mkdir Assignment_1 Assignment_2
```

### **Step 4: Push Changes to GitHub**

1. Navigate to your repository in the terminal.

2. Run the following commands:

```
git add.
```

```
git commit -m "Added Assignment 1 and Assignment 2 folders"
```

```
git push origin main
```

#### **Step 5: Share GitHub Repository Link**

1. Open your GitHub repository.
2. Copy the repository URL from the address bar.
3. Paste this URL into the Google form provided at the time of submission.
